

Group Matching Target tasked by Daz Smith - GM3DS5

Remote viewed by Anita Ikonen - Method EEC

Target 5329-9634

Today April 25, 2018

Start 7:06 PM

Third Stage 2. Target 5. 5329-9634

April 25 2018. 7:06 PM Start.

This one has some interesting rubber, it could be a person. It is the body of a person, and it feels rubbery all of the skin and body tissues from so up close. 53 is the body of a person. It is really up close and uncomfortable to remote view.

I don't feel any aggression or violence anywhere. There is a club, as in a stake or a pole.

The target is this person. He sits on a sofa, and is not standing up, and is not lying down, and is not on the ground or floor. He has something in his pocket, it is a kind of cash (meaning a kind of currency or object with monetary value). It is a compass with the four corners, which makes it look like a four-pointed star. He sits on the red sofa, he is the commander.

Everything is so very easy-going here. It smells bad, it stinks, because it is so close to the skin and body of a person.

Who is this person: It is a man. He is happy and in a cheerful mood. He is happy about what he is doing.

What is unique about this person: He does speeches, but he oversees and supervises other people do work, so he delegates. He is happy doing it. He is a very happy and cheerful person.

It smells! It is a person. I see his body hairs too.

Look around him, what kind of a room is he in: It hasn't got to do with the room he is in, the target is more central to this person and his body.

But look in the room, where is he located: He is a very warm and sunny person, he is very happy and in a cheerful mood.

My question was, where is he located: He is in a comfortable location, where he can relax. He oversees things, he is an overseer, he is very happy.

See his surroundings, where is he located, look from above him: It is hard to see him from above because I just see the close-up of the body of this person.

Look above him: He is smiling, he is a very happy person.

Look above him: It smells there, because I am so close to the body of a person.

He has got something in his pocket, it is a four-pointed star like a compass with four needles as drawn.

Why does he have it: It is a type of currency, it holds value to him.

Who is this person, in what time period is he located, for starters, can you find any electricity: I find wheels of a cart, simple wooden wheels of a cart that has no engine.

The compass told him where to go, this was a voyager. He had to decide in which direction to go. He had a letter in his pocket too, it was a white envelope with that red wax seal of old times.

Open the letter and see what is written there: It tells of his decisions, he had to make that decision. But I feel overall how happy he is as a person, there is nothing menacing here.

Read the damn letter: "Dearly beloved, to those who are concerned...", it starts. "We have chosen to come here, and to settle this place." It has to do with the choice of where to make a settlement!

What is the man wearing, get close to his body and see what garments he has on, it can provide important clues on the time period, or even to the identity of this character: He has got a white shirt on, that is the garment closest to the skin on his chest. It is a white long-sleeve shirt made out of cotton, and it seems to be a buttoned shirt. It is not a fancy material, nothing silky or luxurious, but pretty basic cotton shirt. (I chose to leave him naked on the drawing.)

He has got shoes on, because his feet are not bare. His feet have got more than fabric or socks on. Heavy black boots or shoes. Not sneakers, these are heavy boots.

He has got a blue jacket on over the shirt. It is not a long jacket.

He was feeling happy and optimistic.

Feeling happy and optimistic about what: About his monetary investment. He had invested money into this place. He took some charities, it was like him lifting his own hat upside down so that people could put donations of money into his hat, he accepted money from people for this. The money had been lifted from the bank. He didn't have to go anywhere, he had already come to the right place, he was right here to stay put to stay.

How is the body the target: Because it has to do with where he is.

WHERE IS HE: He came here, he thought that he had made the right decision, and he chose to stay.

Who is he, where is he: He was overseeing something, something about a new settlement, looking on maps that had rivers and locations on the map and landscape and topography on a paper map.

Is it light or is it dark in the picture: It is more dark than light.

Is there water on this target: No there is not, but it has got to do with a journey taken on a vehicle that had wheels on it.

Find the vehicle: I can't.

The man is sitting on the sofa.

Look at the compass that was in his pocket, touch it: It showed him the directions, it is the kind of compass that they draw on maps! Now it makes sense, it is exactly that compass that is on maps!

Ok, so look at the map: The map it was his secret, because he didn't want anybody to know where he wanted to go.

Look at the map very closely and spend long enough time on seeing it: It had to do with where to find gold. The map directions for this man, on where to go. The compass four-pointed star out of gray metal. And they went south. They settled there, the settlement is the key. It has to do with a new settlement.

Go to this new settlement and look around there: I see a bank there, the central bank. They had placed a bank right there on the south side of the river, the river that I saw on the map.

Look at the bank, what does the bank look like: It was used at first to place gold into it.

What does the bank look like as a building: The man placed his gold there.

What does the bank look like: It was a very successful investment.

They settled south of the river.

GO THERE, sit down on the ground and look around what you see: There used to be many crooks there so they had to hide the money and gold inside the bank from the thieves and crooks that were all around. The river flows just north of this location.

He was very happy with his investment. And he placed it here. This was the site. A cartwheel brought them here, on a wooden cart.

What do you think is on the actual target image on the target page: The man's hopes and wishes were collected into what is on that target image, but the man's hopes and wishes themselves cannot be put onto an image, so it is what I feel.

What is done on the target image: People placed money here. It was used for monetary purposes.

And what does this place look like, on the target image: He conceived of this place, from out of his thoughts. I cannot see the target image, instead I see his hopes and wishes.

7:45 PM End.
