Target no target number

Today June 23, 2019

Start 4:03 PM

W1D1SM-T10

Today June 23, 2019

Start 4:03 PM

4:16 PM End RV

There is what looks like tall darkgreen grass, behind it on the right is a black wall with some extended roof over it. There is a lifeform in the grass on the left, it stands on its knuckles and has its mouth wide open in an O-shape, it does not appear to have teeth in its mouth, the eyes are wide open and round and white, there is a dip in the middle of the forehead, it is a harmless creature to humans.

Note: I accidentally hovered the marker over the shortcut icon to the internet page which made a small popup of the target image, and I saw that it is some sort of gray box. No decoy was generated for this target, and this session cannot be used in the set of 10 to evaluate this protocol with.

Haha, I see where I got the creature with the open mouth and two eyes. I should have worked for longer on this session.

4:19 PM End session.
