One search word blind to me during session.

Earthy brown on the floor. Large granular composition. Small yellow text on it like the shape of an upside down U. Emphasis on lower border near the floor.

Probing: There is people and activity here. The bottom of the brown element is against the floor. People can go into it inside it so it is large enough to be some kind of a structure. People are going out from inside of it.

Wow the signal is really dispersed into a white fluff, the signal is hard to work with and I see it in white background.

2:57 PM End RV. Weak signal to work with, hard to probe elements and impressions.

Word was: ruler
