Internet Search Images B5 Target 9
Today April 13-14 2019
Start 12:06 midnight

Five search words from random word generator, the words are known to me from start of session.

Tie Arrow Elephant Shirt Jewelry

Narrow vertical element that extends up is of blue color, on its top part it makes a curve over and downward as if curving back downward. Main emphasis is on the top part at the curve.

12:13 midnight Secondary stage

A spray of yellow liquid drops spreads out behind the top of the loop element in a fan into many directions.

12:17 midnight End RV.

The loop element could be the elephant's trunk (logic was saying to me that it is most likely a tie that is folded to make the knot of the tie, but logic also considered if it could be the trunk of an elephant, but logic mostly thought it could be a tie, since logic knows the search words, but what logic thinks is irrelevant as that is not RV, but just saying). There is a spreading out fan with little pieces. I give this session a B for correlation, though as we see it is not very clear if that grade is warranted or not.
