Internet Search Images B6 Target 6

Today April 14, 2019

Start 11:57 PM

Six search words from a random word generator, I know the words from start of session.

Tiger Neck Lion Orange Red Chilly Chest

There is a green curve like an upside down U in the upper right corner, it faces diagonally open toward down-left. There is a green fluffy mess above the green U shape and a smaller green fluffy mess shape on one of the ends of the green U shape.

12:03 midnight Probing

The green U feels hard to touch like solid metal and serious and dark.

Probe the floor: Wet floor. Dark there, wet stuff can be picked up with hands. Dark here on the floor. Wet on the hand end of the U shape that has the fluff drawn on it, wet stuff drops down from that end.

This is not a lifeform, it is not a living tiger or a living lion (two known search words). No eyes, no life, no characteristics on the U shape of a lifeform animal, no movement.

Wet here on the inner side of the U shape as well. More cold than hot, not warm to the touch, the U shape, and it feels like metal.

This is the amount of probing consistent with previous sessions of this group.

12:08 midnight End RV.

Tough one to grade. The bear forms the upside down U shape and there are green mess trees above it. The right side ear of the bear also forms an upside down U shape. However, I specifically did not sense any lifeforms, the U shape was hard like metal, and it was wet from the U shape and on the floor and this is all inconsistent with the target image. The image itself should be an absolutely wonderful target image for a remote viewing. In spite of anything one way or another, this session gets graded with an F.

No, I took another look at the target image, I have to give this one a C. The textures are incorrect but the dark U shape with the green fluff is correct. The session gets a C for correlation in shapes of basic initial elements. Grade is C. The fact that probing determined it to not be a lifeform and to be

metal means that this session could not get a B. Grade is C.

"Red Chilly" meant as one word.
