

TARGET CHECKLIST Version 1

Protocol or target pool: Wikimedia Judge Matching

Target Number: 12

Today June 4, 2019

Time when making checklist 10:13 AM

CHECKLIST

Main element(s) of emphasis/importance:

1. A big medium-blue whale, dolphin, penguin, or boat. It is slippery and escapes the hand if we try to grab it. It is facing into-page and right and it feels as if it might be traveling into that direction or intending to go in that direction, even though "travel" and "motion" of this boat whale element was not felt. This element is huge and looks fat and bottom heavy, its underside is white. If the front of it which faces into-page and right is its "face" or "head", then the area under its chin is very fat like a huge pouch, in fact the belly itself and body also looks big and fat like a pouch. It has got two blunt penguin flipper arms, if those are arms then there are no fingers on the ends, these are same color as the blue of the body and one on either side of its body, the flipper arms (or airplane wings, depending on what this thing is) are proportionally small compared to its big body. The top of the whale boat is a place where people can be, and this region is very strong and sturdy and can support

a huge load of weight or cargo or people and the element can handle that weight on top of it, it has in fact something there. That space on its top has a floor with wooden planks across, and a raised edge around so it is not just a floor we also have a raised edge.

2. A black diagonally set ore or walkway board goes from floor and up to the top of the whale boat, one or several humans or animals walk across it to go to the top of the whale boat, it seems a narrow path and without a railing.

3. Yellow light on the right side of the "face" of the "whale boat", in the shape of a doorway with an arched top, but this is not a solid object, it is more like a light or a color.

4. A small region on the left lower side of the whale boat, this area is dynamic and active and almost sparkling with vertical displacements across it up and down almost like the way boiling water looks but there is no heat here, it feels more cold but not at all like heat, there is another such region at the base of the yellow doorway light, or that those two are the same and this would connect or tie the target landscape into place.

5. Several humans or animals standing on the floor next to the board walkway looking toward the board walkway.

6. One lifeform walking up the board walkway, this looks like a penguin, it was also seen at the yellow doorway light and on top of the whale boat, it is a blue color and has a white belly underside and two blunt flipper arms, and on the walkway I sensed that the shape or make of its feet is not like human feet there is something different about it. When it is on top of the whale boat, it walks around there and looks down from the edge and it looks down to the white dynamic sparkle thing that is at the bottom left of the big blue whale boat.

7. On top of the whale boat in that place on its top is "comfort", and that red bundle, it is comfortable for a human or animal to be here, comfortable things or surfaces.

8. The floor itself is not flat, instead there are blue and yellow vertical stripes.

Lifeform a) human, b) animal: YES

Describe: The big blue whale boat could be a whale, dolphin, or penguin, unless it is a boat. There are about three lifeforms standing on the floor next to the walkway, these could be the penguin lifeform or be humans. A penguin-like lifeform walks up the walkway, and then this penguin lifeform is also seen on top of the whale boat as described. These could all be one lifeform, the boat, the penguins, or separate, or that the whale boat itself is not a lifeform.

Plantlife: NO

Larger trees or smaller plantlife:

Describe:

Significant water: NO

Describe: In spite of words such as whale, boat, blue uneven floor, penguin, ore, I have never sensed or confirmed any water here. It is wrong to assume there to be water, and I can only report water if I specifically sensed water, in spite of that logic would have one think that water would be here, water was not seen nor confirmed.

Sun or lamp: SORT OF

Describe shape, size, altitude, placement, significance: The large yellow in the shape of a door opening is like a possible light or color, but it does not shine brightly and is not a solid object.

Motion: POSSIBLY

Describe: The whale boat sort of wants to slip forward into-page right, but is at the same time not moving and is still.

Activity/Behavior: YES

Describe: Penguin lifeform walks up the walkway, and then walks around on top of the whale boat and leans down to look toward the white dynamic region at the lower left side from the whale boat.

Large building or construction: NO

Describe:

Significant small items and how many: YES

Describe each: Black ore or path walkway diagonally set from floor up to the top of the whale boat, is a pathway on which a lifeform human or animal can walk from the floor up to the top of the whale boat onboard as a heavy cargo on the top of the whale boat.

Vehicles (eg. boat, airplane, bicycle, train): MAYBE

Describe: If the whale boat is a boat, then as described, a big boat but with small side flippers, blue, a white underside, and otherwise as described.

Describe floor/ground: Blue but not even smooth, has blue and yellow vertical stripes (could mean water and light, but let's not speculate).

Indoors or outdoors or both: For some reason all of this feels like outdoors.

Main elevation(s) emphasized a) below ground, b) ground, c) above ground, d) high up in sky: We are mainly above ground on top of the whale boat, but we also have activity and significance on the floor level such as the white dynamic sparkle region, the lifeforms walking from floor level along the walkway to top of the whale boat. But most important is on top of the whale boat.

Primarily a) nature/natural, b) manmade, c) artificial: Lifeforms is a crucial part so that is nature, but parts of the boat and the walkway are like manmade. But more nature than manmade, since flippers and whale and penguin and the lifeforms are such recurring and important elements and impressions here.

Describe the overall target site area: Big blue space, wide open, no ceiling or boundary walls were ran into. Water was not sensed even though one might guess it to be there based on the wording and descriptions I have used. It centers around that one big blue whale boat on the right lower side of the page, and the presence and activities (walking, leaning over edge and looking down at dynamic white region) of the penguin creature. Big boat whale and penguin are so similar they might be the same lifeform.

Describe surroundings outside of target site: Not probed for

Probable location on world map: Not probed for

Emotions, ambience, feeling: Positive, but emotions are not strongly sensed but only a bit and it was positive, nothing harmful or sinister. The whale boat however feels itself strong and sturdy and capable of loading that heavy weight on its back.

Significance and meaning of target: A big blue whale or boat with something of significance on its back whether a place people or animals can be on, as well as the description itself of the whale or penguin lifeform.

What I think the target is,

- 1) A penguin or dolphin or big blue whale
- 2) A vehicle such as a boat or a submarine where we can be on top of it but it has got those side flippers
- 3) Some sort of lookout post or tower on the lower right side of the image where people can get up to in order for them to look down from there.

Summary or additional explanations: Look for that big blue boat whale shape and figure, especially if there is a whale, dolphin, or penguin. It could also be a big boat or submarine with human presence there. Look for that diagonal path walkway. A blue with a white underside.

10:39 AM End checklist notes.
