LIST SPECIFIC COMPONENTS:	Dead animal, Attacking animal, Claws, Spikes, Eyes, Teeth
TARGET IDENTITY:	Dead animal such as an alligator
MAIN ELEMENT:	Dead animal lying down

DESCRIBE THE TARGET:

smells very bad, the red region on the lower left is repulsive and a dead animal, spikes and claws everywhere attacking or watching the dead animal, bird feathers or puppy dog ear, eyes, teeth, the diagonal black pole is used to stir or poke at the dead animal with (round oval outline under bird was my first impression of a "mouth" element, and is a mouth)

Feedback: Interesting, the story on the target image plaque is about a creature that was killed.

When I was drawing the dead killed animal on the lower left, that red one, I thought that it was a

beetle or an insect, the story on the plaque is of an insect.

This is bad protocol, but I am now just seconds after seeing the target image, internet searching on the names in the story on the plaque. Viruncamban looks like an alligator man. Bad to do, because the RV mind might be remote viewing what I am doing now, not knowing that the impressions right now are not part of the target...

I will not do a checklist for this one. How do I know if the right answer was to remote view the physical visual representation of the plaque itself, or the story? I cannot fill out the target checklist, and therefore I cannot grade my report checklist against one.
