

## TARGET CHECKLIST Version 1

Protocol or target pool: Wikimedia Judge Matching

Target Number: 4

Today June 2, 2019

Time when making checklist 9:01 AM

### CHECKLIST

Main element(s) of emphasis/importance: A big yellow lemon-like element which sits on green blades of grass and on brown dirt. There is also a blue inflated ball with an open top or open left side which also sits on the dirt and grass. We also have a brown leaning board which sits against the grass and leans a bit, it is near to the yellow lemon-like element. All three elements: the lemon, the blue open ball, the brown board, have these spikes or similar to blades of grass that extend outward from them which looks like they have exploded and burst but it is not moving it is like a moment frozen in time with a stop watch set to pause.

Lifeform a) human, b) animal: NO

Describe:

Plantlife: YES

Larger trees or smaller plantlife: No trees. If plantlife then all are small plantlife.

Describe: The yellow lemon-like element could be a yellow flower, but if it is then it is a notably dry flower without any moisture in it. There are what look like lush blades of green grass along the ground. At least one blade of green grass connects to the yellow lemon-element. But inside a blade of grass was found a red cord which runs along the center of it, not consistent with grass.

Significant water: NO WATER DETECTED ANYWHERE

Describe:

Sun or lamp: The lemon-element does not seem to be a light or a lamp, but experience shows me that from this target pool, any yellow element could be a lamp. The lemon-element does however not seem to be a light or a lamp.

Describe shape, size, altitude, placement, significance:

Motion: POSSIBLY

Describe: There is as if all three elements have burst or exploded with shreads, those blades or blunt spikes, spreading outward from them, yet it is frozen in time like a moment, so it does not feel at any time like a motion, hence it probably only describes the physical appearance of these items. So it is probably not a motion at all whatsoever.

Activity/Behavior: NO

Describe:

Large building or construction: NO

Describe:

Significant small items and how many: YES

Describe each:

1. The large yellow lemon is a bit larger than a regular small item. We can go inside it, and probing it always takes us to its inside where we have several green swirly things possibly plantlife. The lemon sits with its bottom against the green grass and dirt ground. The yellow lemon element has blunt spikes or blades that are yellow which spread out away from it which looks like a burst but could also for example possibly be flower petals. At least one green blunt blade of grass connects to the yellow lemon directly attached.
2. Brown diagonally leaning board, it too has those blunt brown spikes as if the board has burst outward in shards. The bottom of the board sits against the grass and ground below it.
3. The big blue ball, this is empty air inside and is inflated with air and has some air pressure that is pressing outward from within it, meaning it has got a pressure inside. It is not a complete sphere ball however because on its left-top side or on its top a part of the sphere wall is missing so that it is open there, however it does not let us put a hand into its inside space through the open part. This blue sphere also has that explosion type of spreading bursting look to it.

Vehicles (eg. boat, airplane, bicycle, train): NO

Describe:

Describe floor/ground: Green blades of succulent thick grass, not sharp edges but a bit blunt edges.

Also brown dirt on the ground.

Indoors or outdoors or both: Feels more like outdoors.

Main elevation(s) emphasized a) below ground, b) ground, c) above ground, d) high up in sky: Ground. Nothing below ground. The big blue ball is so large that it seems to be just a bit above ground, or that it sometimes spends/spent some time above the ground too, but mostly it sits on the grass but there is this look or sensation as if it were also in some way above ground too. Nothing was high up in the sky.

Primarily a) nature/natural, b) manmade, c) artificial: It mostly everywhere is like natural, the grass and the dirt on the ground, even the lemon mostly feels like natural. But the lemon, and especially the blue ball, could be manmade. The brown board could be natural but there is a slight chance that it could also have been some sort of manmade. My vote is on natural elements but that is not entirely certain for all of the elements.

Describe the overall target site area: We are on the grass on the ground and we have those two or three (if the brown board can be called interesting) interesting elements there.

Describe surroundings outside of target site: Not investigated.

Probable location on world map: Not investigated.

Emotions, ambience, feeling: None, there is a distinct lack of feeling, emotion, thought, intent, from this target.

Significance and meaning of target: These interesting objects, the yellow lemon-like element, the brown board, the blue ball. The spreading out burst shreads or blunt blades of grass shapes are important descriptors.

What I think the target is,

- 1) Some large yellow lemon-like object with the blue almost full sphere ball near it. Whatever that means.
- 2) Balloons or such that have burst and exploded.
- 3) A yellow dry flower such as a cactus flower, the blue ball would then not make much sense there would it.

Summary or additional explanations: Look for the large oval (wider in horizontal than its width in vertical) yellow element which reminds of a lemon, it is not necessarily an actual lemon however, I just like to call things by names, but it is basically a very large, almost oval but not a perfect oval yellow shape or object. The yellow lemon-element is very large! It should sit on the ground with green grass and brown dirt under it, and it could also itself be a flower because a green blunt blade which is probably grass, connects directly to it attached to it.

The main thing here is to look for the large yellow almost-oval, it should be very large. But search all over the target image for those bursts that were found on the yellow element, on the brown board, and also on the blue ball, those are similar to blades of grass, they spread out from each of these elements, in the color that the element has, meaning yellow spreading from the yellow element, brown from the brown board element, blue from the blue ball element, but the green grass is also

made the same way like those bursts or blunt spikes, those will be important as they were seen in four different places and namely on all four out of four elements!

Look for in case some elements may have burst on the target image, such as a balloon, or something that may be inflated with air so that it has an air pressure inside, because usually if I find blunt spikes on a target I don't start talking about something having "burst", so the bursting seems to have possibly actually happened that something burst or that something looks or is as if it might want to burst.

9:19 AM End checklist notes.
