

## TARGET CHECKLIST Version 1

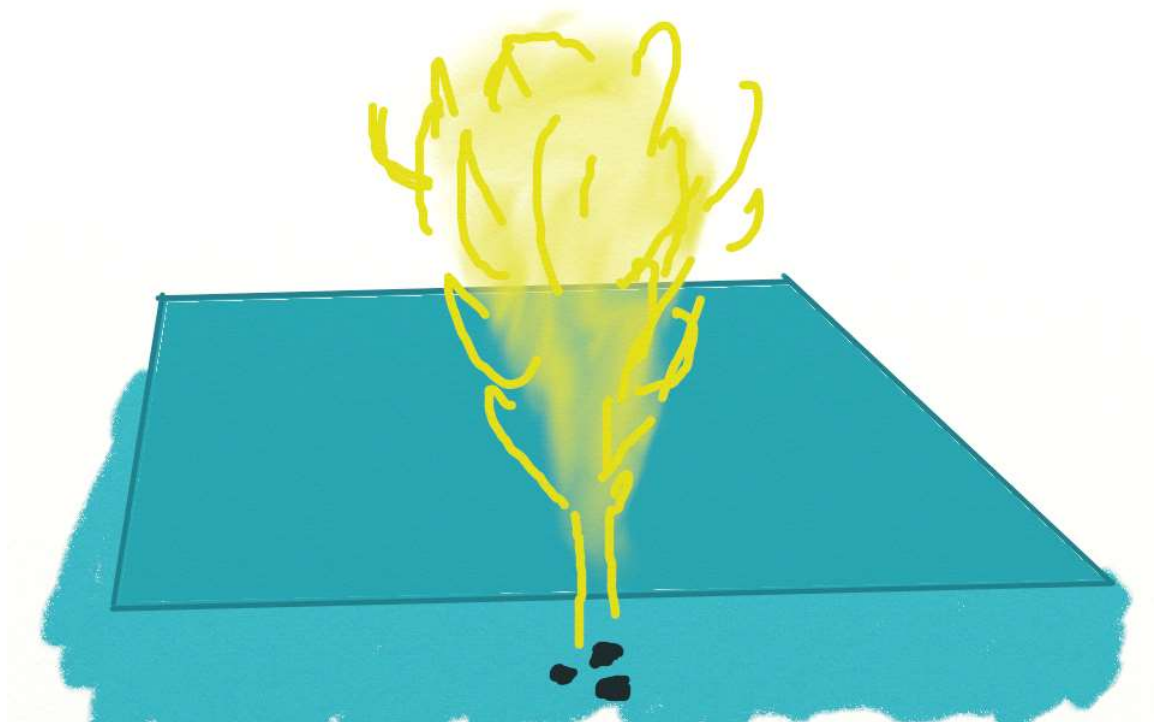

Protocol or target pool: Wikimedia Judge Matching

Target Number: 9

Today June 3, 2019

Time when making checklist 2:28 PM

Wikimedia Judge Matching 9

### CHECKLIST

Main element(s) of emphasis/importance:

1. A big yellow burst, it starts under the blue surface and expands or explodes above the surface.
2. Large blue surface, continues as a blue space beneath the blue surface.
3. Three or so black oval rock-like elements under the blue surface.
4. A flow of oxygen upward through the center of the yellow burst.

Lifeform a) human, b) animal: NO

Describe:

Plantlife: NO

Larger trees or smaller plantlife:

Describe:

Significant water: MAYBE

Describe: If the big blue surface that is also blue under the surface is water, but I do not know if it is water.

Sun or lamp: MAYBE

Describe shape, size, altitude, placement, significance: The yellow burst is very bright, and it burns to get near to it, either burns from bright light, or burns from heat, or burns from radiation, or burns from chemical burn, it is very bright and burns if it is touched.

Motion: YES

Describe: The explosion starts at the rocks under the blue surface, from this shoots straight up a projectile which when it reaches to the blue surface it explodes and expands and bursts to become the big yellow burst that is above the blue surface. There is a second element with motion and that is the stream of oxygen-rich air, or pure oxygen, which flows upward through the center of the yellow burst.

Activity/Behavior:

Describe:

Large building or construction: NO

Describe:

Significant small items and how many: YES

Describe each:

1. The three or so, oval black rock-like elements under the blue surface.

Vehicles (eg. boat, airplane, bicycle, train): NO

Describe:

Describe floor/ground: There is a big blue surface but it could be a water surface I do not know. The blue continues under its surface.

Indoors or outdoors or both: Feels more like outdoors than like indoors, because the space we have got is huge without any ceiling anywhere near above is, and no walls were felt near to us. We can even continue down below the blue surface, so it really is a huge big wide open expanse, which seems more like outdoors for that reason.

Main elevation(s) emphasized a) below ground, b) ground, c) above ground, d) high up in sky:

Surface is main elevation, but if this is ground level I do not know for certain. It feels like water surface, so that would be same as saying "ground level". The yellow element burst however takes up a lot of space in the sky, so we are in the sky also. We also find the burst starts under the surface, so we are also under the surface or ground level.

Primarily a) nature/natural, b) manmade, c) artificial: Feels like primarily nature. The burst could be coral because the shapes look like coral stems, but this could also be some sort of hot air balloon or jet engine flame. I do not know if this is natural or manmade.

Describe the overall target site area: A big blue open expanse, and there is the huge yellow burst taking place and seen there. The sky itself, or the space above the blue surface, is a wide open white

space.

Describe surroundings outside of target site: Not probed for.

Probable location on world map: Not probed for.

Emotions, ambience, feeling: No emotions, thoughts, felt whatsoever.

Significance and meaning of target: The yellow burst which is made out of a lot of energy and looks like a burst or an expansion.

What I think the target is,

- 1) An energy explosion such as a bomb explosion or the flame with oxygen flow of a jet engine or a hot air balloon, that sort of device.
- 2) A coral with the stems of the coral making it look like a burst due to its permanent shape.
- 3) Some sort of lamp or glow or energy.

Summary or additional explanations: Look for a big yellow element which has a shape that looks as if it would have burst and expanded, also think about if there could be an oxygen flow through somewhere. The big blue could be the ocean but I cannot be sure about that. No humans or animals were detected, no houses, no real ground, no many small things, so also think about what was not detected or reported.

2:37 PM End checklist notes.
