Target WR30

Today April 24, 2019

Start 10:17 PM

Note: The right margin says from the file name "& John". Logic cannot piece that together into a clue, and I already had the first initial element of the yellow flower, so I will keep going.

From this session and onward, I will try to not write everything both here and in the elements listing, so anything that would become repetitive, goes now only into the elements listing. I don't know if that's how I want to build text reports, but let's see how it goes.

10:22 PM Secondary stage

I probed some and struggle to get further, I might with some more effort but the signal is not strong or something else is making this a bit "flat" to work with.

10:31 PM End RV.

I can give this a C for correlation on basic shapes and colors, the white on the ball make like large white dots. This target image was really hard to work with the signal and to probe around. The two first lobes of the flower I made look like the yellow t-shirt sleeves.

10:35 PM End session.

## ELEMENTS

IE. Yellow flower, large almost closeup. Several thick yellow flower petals spread out, but these are thick flower petals.

P. Like made of glass when tapped. Lower border is white. Is a shell cup and is not filled up underneath, is empty underneath and inside and has no bottom floor to it.

IE. White dots above the yellow flower.
