Target WR33

Today April 25, 2019

Start 1:53 PM

2:00 PM 2.S.

2:07 PM. I accidentally hovered the mouse cursor over the internet browser icon and this made a small popup of the page and I saw the target image that it is black and white and looks busy. I was just about to draw the group of people who are walking with busy steps into the page, but now I cannot draw or add anything more to the report because I accidentally saw a small version of the target image, not to see what it depicts but still I consider this to mark the end of this session, even though I was really enjoying the flow of this one and the work I had put into it so far.

End RV.

Oh wow! I did real good! I instantly recognize the man with the poise, he has that exact look on his face, the one standing with his hands on the back of the chair at the back. I would have loved remote viewing this image, this session went really well, too bad that the popup came up I was going to love exploring this one but at least with what I had so far I give this session an A.

The yellow curve is found on the flag but is not a plateau that one can stand on. The gray leaning walls could be from the background decoration.

I look up on the internet the definition of dignitary: "a person considered to be important because of high rank or office". It is fun that I used this word without knowing what the word means.

I am still disappointed that I had to end the session prematurely. I will take a print screen to show you what the popup looks like on my screen and how big it is. It only appeared for a short while and I did not register the content of the image but it is reason to end a session. Grade A.

2:19 PM End session.
