Target WR40

Today April 26, 2019

Start 9:25 PM

I adjusted the right margin of this text editor box over the internet browser and saw that the last letter of the target image file name is "f" and I moved it back so I do not see it. This is hardly a spoiler.

9:32 PM 2.S.

10:03 PM End RV it is time for me to go to bed. Summary of what I have: Main elements or background are a light yellow color. The target site feels very soft from the elements, there is a human or otherwise mammal that is soft and hairy, the emotions are described below in the elements listing. The human is on some kind of boardwalk. I have felt a harbor but that is a premature labeling. The human has a brown red box and from inside the box takes out a necklace or chain made of orange spheres threaded together or otherwise in a chain. Two eyes with eyelashes were seen and the hairy figure 8 so hairs are prominent. What I think it is, it seems at this point to be a woman who receives an orange pearl necklace from a box and she is very happy about it, but this is just a guess because I did not take this session to completion, I end this prematurely but it is still possible to match a report to a target image based on initial elements and some part of secondary stage which I also got to.

The back wall is a light yellow color. We are not on a boardwalk and not on a harbor (those statements are not incorrect RV statements because those are premature labeling by logic in terms of RV impressions that I had that were not probed or RV-labelled yet). There is however that pale gray pathway or street for walking on the right in the image so that is correct.

As for boxes we have several square signs, one of the signs has red color. There is orange text which is perhaps similar to orange beads in a thread. I'm not sure. I will give this session a C.
