Target WR49

Today May 14, 2019

Start 2:09 PM

2:14 PM Secondary stage interaction.

2:19 PM Secondary stage effort.

We are always on the ground on the soil. We can go inside it. There is some motion at the brown element, like it is earth being dug around, tilled, lifted up in chunks.

Inspect the yellow orb for symmetrization, i.e. confirm if it is an orb: No it is not an orb shape.

2:27 PM End RV. The target is brown soil close to ground.

I give this session an F, I should have sensed a human and the solid armchair and column, even though the lumpy soil with movement could have been the dress. Grade F.

2:29 PM End session.

ELEMENTS

IE. Earthy brown-red-black soil contains iron particles. Looks tilled up and lumpy.

T. We can go under the soil.

GP. There is iron in the soil.

IE. A light shines further away in the horizon at ground level.

T. We watch what is right at the ground close to ground.

GP. We go away from here out of page.

IE. We are digging in the soil earth.

T. We are in the soil.

GP. We find loose lumps of soil there.

IE. A large light yellow sphere orb like a sun is above the ground.

T. We fall slowly back down to the ground.

GP. It cannot be touched it evades.

IE. Iron in the soil.

T. It doesn't want to come up out of the soil.

GP. It goes up away from the soil.
