Target WR50

Today May 14, 2019

Start 2:51 PM

Go to what travels: It forms a curved shape on its front, like a boomerang shape.

Are people beating on drums with the palm of their hands, is that what is jumping up and down?

3:35 PM End RV. I don't know, maybe some resemblance, but I give this session an F. No, this one gets a C, I am too quick to judge. Something is being pushed and moved, and there is possibly a red wall, and the boomerang shape is found on the gate and on the coffin though pointy with sharp lines not curved like a boomerang. People jumping up and down not in unison, but here are people walking with their feet going up and down. No let me give this one a B, I just feel that many things are spot on. Grade is B.

3:40 PM End session.

ELEMENTS

1E. Blue, fresh.

2. 1E. Travel from left toward the right.

Forms curved shape on its front like a boomerang shape. The traveling element dives down. The travel toward the right also feels like a pull or a tug toward the right. A red wall extends downward from the front of it. This boomerang shaped element on the right is pulling something that is behind it on the left. There are two beige cushions at the back of the boomerang and there is jumping up and down going on there, where not all jump at the same time. Something is bouncing up and down on the rightward pushing element.

2. 1E. Little yellow or green beads jumping up and down, they don't all jump up at the same time.

They feel solid like little hard plastic pieces. They have to go down. A thin plastic piece, flat but with asymmetric outline.

1E. There is something under the water. It has a curved back on the left, and smooth surface texture,

and is blue, it has thoughts.

IE. We can go even further down deep, further down under the blue curved element under water.

IE. People are jumping here up and down! They are not jumping in unison.
