Target WR62

Today May 26, 2019

Start 5:27 PM

I walk into-page from main target area and run into blue reflective flat surface, window glass or water probably window glass since it was in the vertical plane.

5:47 PM End RV. I could have gone further but I am very sleepy now and there is no way that I know to save a session.

The target was a map. No way to know if I went to somewhere on the map, or what happened. This session gets no grade.
